

PCR plate Rigid Frame

The right frame for PCR

BRAND. For lab. For life.®

- + High stability and rigidity with the polycarbonate frame
- + Rapid heat transfer through thin vessel walls
- + Suitable for all standard thermal cyclers and fully automation compatible

PCR plate 96-well and 384-well

Rigid Frame

For medium and high sample throughput, 96-well and 384-well plates from BRAND are the efficient solution for PCR and qPCR. Our Rigid Frame PCR plates have a strong polycarbonate frame to ensure safe handling in semiautomated and automated pipetting systems and optimal evaporation protection. The rigid frame also allows the use of very thin-walled wells from 100% virgin medical grade polypropylene. The uniform and thin wall thicknesses of the wells ensure rapid transfer of the temperature from the cycler to the sample, thus reducing cycle times.

A number of skirt choices ensures a good fit in common thermal cyclers for efficient heat transfer. Choose between semi-skirted and fully-skirted plates. Different colors help to

distinguish between the workflow steps. For qPCR, plates with white wells are available that optimally reflect the fluorescence signals.

The clean room quality of the PCR consumables from BRAND guarantees reliable results. The 96- and 384-well Rigid Frame plates from BRAND are also produced under controlled clean room conditions and thus meet the purity criteria of the BIO-CERT® PCR QUALITY level.
