WHEN PERFORMANCE COUNTS

GREEN ABRASIVES

High Teck Abrasives deliver fast-cutting performance, clean finishes, and long-lasting durability across every stage of surface preparation.

Sanding Sheets

FAST SANDING • ANTI CLOGGING • ALL SUBSTRATES • ALL COATINGS

GREEN ABRASIVE SHEETS are a cost-effective product, made of high quality aluminum oxide grain, flexible latex paper and strong phenol resin. They are excellent for blending and finishing on metal, aluminum and carbon steel. They also work well on primer, paint, sealers, topcoats, fiberglass, and plastics.

Air File Rolls

GREEN ABRASIVE SANDING SHEET ROLLS are a cost-effective product, made of high quality aluminum oxide grain, flexible latex paper and strong phenol resin. The PSA backing makes sheet changes fast and easy. They are excellent for blending and finishing on aluminum and carbon steel, body filler, painted surfaces as well as woodworking applications for heavy and medium stock removal and finishing on hardwoods, softwoods, and composites.

Purple + Ceramic Film Sanding Discs

PURPLE + CERAMIC FILM SANDING DISCS are a film-based product, with ceramic mixed with semi-brittle corundum grain, providing super-fast sanding speed. Purple is stronger and more durable than other film-based products. Special coating technology ensures anti-clogging performance. Purple discs are available in a laser-cut multi-hole pattern for maximizing dust extraction.

High-Performance Abrasives Engineered for Professionals.

Flexible Sanding Discs

SUPER FINE FLEXIBLE SANDING DISCS are a TPU-based product, with cutting edge dry sanding technology. The super sharp abrasives, super coating technology provide strong cutting power but extremely uniform and shallow scratch can be realized. The flexible nature of the backing decreases rework risks.

- Features Fast and Uniform coverage with extremely shallow scratches
- Super coating technology provides perfect anti-clogged performance
- Ideal for light sanding on all types of surfaces
- Save time and money, reduce the risk of reworking

Foam Backed Discs

FOAM BACKED PAINT FINISHING DISCS

Designed for defect removal, surface refinement, and polishing preparation, Foam Backed Paint Finishing Discs combine premium Silicon Carbide abrasive grains with a flexible foam construction to deliver a consistent scratch pattern and superior finishing results. The flexible foam structure conforms easily to curves, contours, body lines, and edges while minimizing the risk of sanding marks. Wet sanding is recommended for optimum finish quality and extended abrasive life. Designed to help technicians achieve a premium finish while reducing polishing labor and rework.

WHEN PERFORMANCE COUNTS

SANDING ABRASIVE

Wet & Dry Sanding Sheets

WATERPROOF SANDING SHEETS features silicon carbide abrasives mounted on flexible, waterproof paper, ideal for creating a consistent, smooth, refined finish.

- Silicon Carbide is our fastest-cutting mineral abrasive for a superior finish
- Waterproof backing supports wet applications for decreased loading and a faster cut
- Used wet or dry on paint, primer, gel coat and metal
