

## Thermowell for temperature sensors

THERMOWELL, D6/1,5"CLAMP/L=230

EC 1935/2004 EHEDG Certified FCM FDA

### Application

|                 |                                     |         |
|-----------------|-------------------------------------|---------|
| Design          | for temperature sensors EL = 300 mm |         |
| Pressure rating | 25 bar                              | 2.5 MPa |

### Mechanical data

|                                                   |      |                                                   |
|---------------------------------------------------|------|---------------------------------------------------|
| Weight                                            | [g]  | 500.5                                             |
| Material                                          |      | stainless steel (1.4404 / 316L)                   |
| Sensor connection                                 |      | 1/2" NPS Ø 6 mm suitable for G1/2 and 1/2" NPT    |
| Process connection                                |      | Clamp DN25...DN40 (1...1,5") DIN 32676 (ISO 2852) |
| Surface characteristics Ra/Rz of the wetted parts |      | Ra < 0.6 µm                                       |
| Installation length EL                            | [mm] | 191                                               |
| Bore length BL                                    | [mm] | 228.6                                             |

### Remarks

|               |        |
|---------------|--------|
| Pack quantity | 1 pcs. |
