

Positioner for industrial valves

SMART POSITIONER SINGLE ACTING

| Application                   |                                                                   |
|-------------------------------|-------------------------------------------------------------------|
| Application                   | suitable for single-acting / spring-return quarter-turn actuators |
| Components                    | position sensor and control unit: 1, MVQ301                       |
|                               | throttle plate: 1, ZJF123                                         |
|                               | 3/3-way solenoid valve: 1, ZJF121                                 |
|                               | Connection cable: 1, EVC508                                       |
|                               | Silencer: 1                                                       |
|                               | with mounting material                                            |
| Interfaces                    |                                                                   |
| Communication interface       | IO-Link                                                           |
| Unterstützte Masterportklasse | B                                                                 |
| Mechanical data               |                                                                   |
| Weight                        | [g] 892.4                                                         |
| Operating pressure range      | [bar] 2.5...8                                                     |

ZZ0687

Positioner for industrial valves

SMART POSITIONER SINGLE ACTING

| Remarks       |        |
|---------------|--------|
| Pack quantity | 1 pcs. |
