

3500 SERIES

The KeyInCode 3500 Series is a residential-grade lock ideal for any home, small office or vacation rental property. It is available with a lever handle or deadbolt latch. New BLE (Bluetooth) functionality makes it easier than ever to set up your lock in the KeyInCode app. It also allows admins to lock/unlock the device within Bluetooth range.

Key Features

- ✓ Designed to be easy to install, connect, manage and use
- ✓ Embedded Wi-Fi for standard connectivity. No gateway or hub required
- ✓ BLE Enabled: Accelerate lock onboarding and Wi-Fi setup via Bluetooth
- ✓ Remote control and monitoring from anywhere using your smartphone or laptop
- ✓ Supports passage mode, auto-lock mode and passage schedules
- ✓ Lock retains all programming and data even in the event of power outage or internet interruption
- ✓ Low battery warning indicator
- ✓ Store up to 40 weekly access schedules (e.g., M-F, 9-5)
- ✓ Set notifications for user entry and alerts for unexpected issues
- ✓ Lockout functionality after 5 incorrect code attempts
- ✓ Utilize temporary codes for guests and visitor management
- ✓ 2 override keys included
- ✓ Works with RemoteLock ACS wired solutions

Use w/RemoteLock & KeyinCloud

This lock can be paired with RemoteLock or KeyinCloud access control software for advanced remote management. When enabled with RemoteLock software, the KeyInCode 3500 Series integrates seamlessly with popular booking platforms to automate guest access.

- Eliminates costs of on-site personnel or expensive servers/panels
- Works with many of the most popular brands of locks
- Accommodates any type of door—hard-wired access control and smart locks, too
- Integrates with popular booking platforms and property management software
- Offers one centralized platform for many operational technologies
- Is scalable, easy-to-use and future-proof
