

Enhance®

Pre-Shaped Allograft Wedges

The ENHANCE® line provides pre-shaped calcaneal lengthening and osteotomy wedge allograft solutions for foot deformity correction procedures

**MTF
ADVANTAGE**

No Terminal Radiation
No Harsh Chemicals

Over 9 million grafts distributed

In Partnership with:

mtfbiologics

Allograft Wedges

Pre-Shaped Wedges from CONMED in partnership with MTF Biologics provide surgeons with convenient and reliable allografts for flatfoot deformity correction.

- Dense cancellous bone provides an excellent reincorporation environment
- Two-side cortical rim provides structural strength
- Pre-sized design eliminates the need for intraoperative shaping
- Cotton and Evans technique specific shapes

Note: Allograft wedges may be trimmed from the cancellous sides to customize length and width.

Calcaneal Lengthening Procedure

- ① Opening osteotomy prepared with sagittal saw and osteotome.

- ② Converging K-wires (max. of 2.8mm) are utilized with pin distractor.

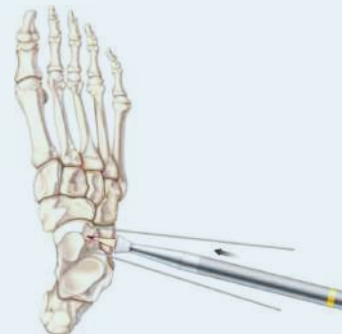

- ③ Trial Sizers represent allograft wedge dimensions.

- ④ Reconstitute the graft utilizing distractor, implant pre-shaped wedge.

Note: Graft length and width may be modified for improved fit

- ⑤ Final graft position can be manipulated by gently tamping the graft.

- ⑥ Completed procedure with proper graft placement
Surgeon discretion to be used for graft fixation.

Tissue Safety and Integrity

MTF is a non-profit organization founded in 1987. Since its inception, MTF has recovered over 139,000 donors and distributed over 9 million grafts for transplantation while maintaining an exemplary safety record. Because of all of the safety steps instituted by the Board of Directors, Medical Board of Trustees, and Donation Board of Trustees, MTF has become the number one tissue bank in the nation and is one of the largest providers of grafts in the world.

- MTF employs the latest technologies such as Nucleic Acid Testing and conducts serological tests on all donors.
- MTF leads the industry in donor selection criteria with standards that exceed those set by the AATB.
