

WIRELESS MEASUREMENT DATA COMMUNICATION SYSTEM U-WAVE®

New wireless system improves efficiency by eliminating the need for data cables when sending measurements to a PC.

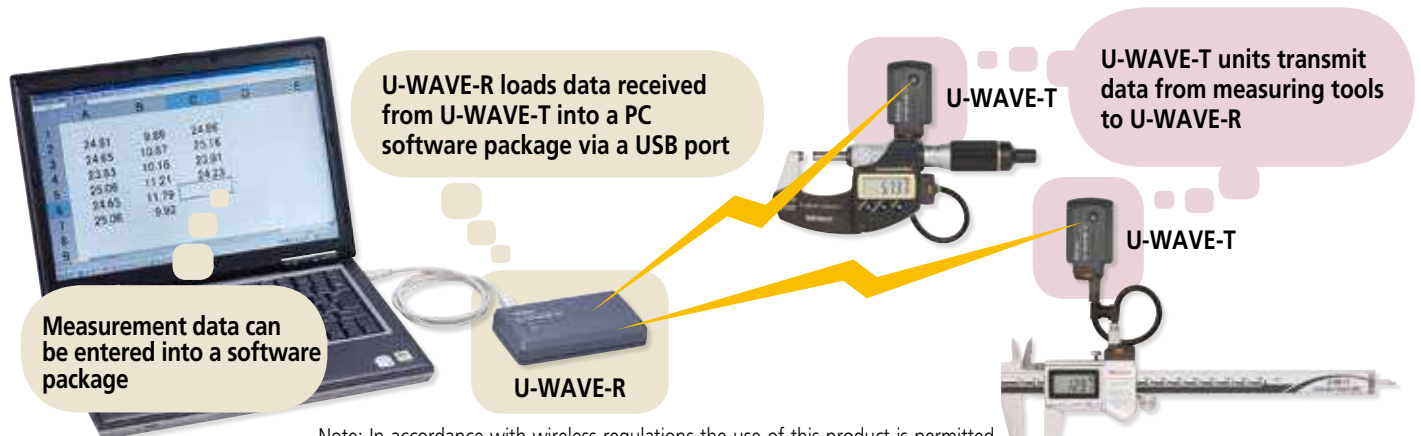

SMALL TOOL INSTRUMENTS
AND DATA MANAGEMENT

U-WAVE®

MeasurLink® ENABLED
Data Management Software by Mitutoyo

The **U-WAVE** system enables easy wireless data communication from a measuring tool to a PC using the Digimatic protocol. Measurement efficiency is improved by eliminating the long and cumbersome data cables. The user-friendly interface allows data to be loaded into any software product that accepts keyboard input, such as Excel* or Notepad.

*Excel is a registered trademark of Microsoft Corporation.

Note: In accordance with wireless regulations the use of this product is permitted in Japan, Europe (a total of 32 countries including 27 EU members, 4 EFTA members and Turkey), U.S.A. and Canada. This product must not be used in other countries or areas.

Keyboard emulation or VCP

The **U-WAVEPAK**, **U-WAVE-R** standard package features a keyboard interface function. This allows measurement data to be easily entered into in Excel, Notepad or other format that accepts numeric value input via a keyboard.

In addition, a virtual COM driver allows measurement data to be input to a program that supports **RS-232C** serial communication. The communication speed (baud rate) is fixed to 57,600 bps.

Dustproof and water resistant IP67 model

IP67-type **U-WAVE-T** (No.02AZD730C) has an **IP67**-level dust/water-proof function. This model can be used in combination with, devices such as a coolant-proof caliper, micrometer or indicator.

IP67

Installation Bracket Kit Order No. 02AZE200

Wireless Measurement Data Communication System

Up to 100 measuring tools can be connected to one U-WAVE-R unit

Up to 100 **U-WAVE-T** units can be registered with one **U-WAVE-R** unit, and up to 16 **U-WAVE-R** units can be connected via a commercially available USB hub.

MUX-10F

(up to 4 wired channels)

U-WAVE

(up to 100 wireless channels)

Data communication range up to 60ft possible

The maximum reliable communication range is approximately 60ft*. Even when multiple **U-WAVE-R** units are used within the range of 60ft, interference does not occur since an ID (00 to 99) is assigned to each unit. Radio interference between **U-WAVE-R** units can also be avoided by setting different frequencies (selected from 15 bands).

*Actual range depends on the local radio transmission characteristics.

Different frequencies ensure no radio interference

Different frequencies allow multiple devices to be used in the same communication range.

A 4-digit value in **** indicates a **U-WAVE-T** ID.

Approximately 400,000 Data Transmissions

One commercially available CR2032 lithium battery will support about 400,000 data transmissions. Assuming that the device is used 20 days a month, sending data 2,000 times a day, one battery will last for about 10 months.

Wireless operation improves efficiency in measurement data recording

Measurement on surface plate

With a wireless device, the surface plate and PC desk no longer need to be adjacent, allowing flexible layout in the inspection room.

Measurement of large workpieces

With **U-WAVE**, operators can perform measurement freely around the workpiece with no cable constraints.

Measurement using long measuring tools

U-WAVE eliminates cable constraints, making the use of hard-to-handle, long measuring tools easier.

Purchase the following four products (**1** to **4**) to send data to your PC.

3 U-WAVE-T/tool connection

A short cable is used to connect a measuring tool to its **U-WAVE-T** unit. Select the appropriate cable from **A** to **G** below (7 types) to suit the measuring tool. Detailed information on cable suitability is given on page 7.

	Type	Order No.
A	Water-proof model with output button	02AZD790A
B	Water-proof model with output button	02AZD790B
C	With data-out button type	02AZD790C

4 Mitutoyo Measuring Tool with Digimatic Output

This product can be connected to a measuring tool that provides Digimatic data output. Digimatic output is Mitutoyo's proprietary output format. The Digimatic specifications have remained unchanged since the first Digimatic measuring tool was released. Therefore, any tool having a Digimatic port can be used, regardless of model. Connectors on some older instruments are not compatible with connectors used on the above-listed cables. See cable list on page 7.

Example Digimatic measuring tools pictured with connecting cables. Instrument models/cable product numbers are listed below.

Press a button to send measurements
to a PC via wireless communication.

Once the **U-WAVEPAK** data interface has been started, received data is converted into a keyboard input and entered into the active cell.

When the data input button is pressed, the value displayed on the measuring tool is entered into the active cell of Excel followed by "Enter" key input. The cursor movement direction after input (up, down, left or right) can be set in Excel.

U-WAVEPAK

Specifications of U-WAVEPAK (setup software)

Before using **U-WAVEPAK** for the first time after purchase, IDs, frequencies, and other settings must be made. The data interface function allows measurement data to be loaded into a PC in Excel, Notepad or other software file that accepts keyboard input. Data can also be input to a program that supports **RS-232C** serial communication using the virtual COM driver.

1) Operating environment

Supported OS: Windows 2000 Professional (SP4 or higher)
Windows XP Home Edition (SP2 or higher)
Windows XP Professional (SP2 or higher)
Windows Vista
Windows 7
Windows 8*
Windows 8.1*

* 32-bit/64-bit operating systems are supported.

Other information: USB port needed

2) Initial setup procedure

- (1) Install the **U-WAVEPAK** (setup software).
- (2) Connect the **U-WAVE-R** main unit to the PC with a USB 2.0 cable.
- (3) Install the dedicated USB driver and virtual COM driver.
- (4) Set IDs and frequencies for **U-WAVE-R** and **U-WAVE-T** with **U-WAVEPAK**.
- (5) Press the DATA button of **U-WAVE-T** once to write settings into **U-WAVE-T**. Once this procedure has been performed when using **U-WAVE-T** for the first time, settings are then stored in the main unit memory.

Connecting Cables

Two Types of Connecting Cable

A much-needed foot-switch type connecting cable (lower drawing at right) has been provided in addition to the conventional type (upper drawing at right) of connecting cable between the **U-WAVE-T** unit and a measuring tool. Identify the connector type compatible with your measuring tool in the following table listing 7 types (**A** to **G**), and select either the standard type or foot-switch type cable according to the purpose. The table also lists wired-type connecting cables with the same connector as those 7 types on each measuring tool. Specify those cables as required.

Foot-switch (Optional)
Order No. **937179T**

The foot switch is connected to this connector.

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top-quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
