

Versa Multi-Purpose Cabinet Rack #282120-LG

Versa Multi-Purpose Cabinet Rack #262120-LG

Versa Multi-Purpose Cabinet Rack - #262120

The Versa Rack is a multi-functional mobile charting system that will accommodate all sizes of binders. The unique shelf design provides a 10 degree angle for storing side open binders, books and other items. The back of the shelf has a 2" indentation to keep the side open binders close to the front of the rack. The indentation can also serve as an alternative shelf for top open binders. This will hold the top open binders so they are level and will not project past the front of the cart. The Versa Rack is available with 2, 3 and 4 shelves. This does not include the top work surface. The heavy duty frame of the Versa Rack will insure continual usage of the cart for many years. Fully retractable locking panels protect your charts from general access and require key security to access patient information. We provide a full lifetime on the cart (1-year on locks and casters).
