Cordless Implant & Prosthodontic Screw Driver

Push Button Mini Head

Push button is designed softly and securely. Mini Head is increasing visibility and making access to the posterior of the mouth much easier.

Torque Calibration System

Saeshin's torque calibration system ensures highest accuracy from the motor used to apply torque during operation processes.

Extension Start/Stop Switch

A detachable extension Start/Stop Switch to allow dentists to operate it easily. It also helps to reduce fatigability of fingers.

Stable & Powerful Torque Control

Adjustable from 10 to 40 N.cm in 5 N.cm steps. It allows precise and stable tightening/unscrewing of screws.

Cordless System

A Cordless Screw Driver offers is the convenience it allows the user to work without worrying about the nearest power plug or annoying and tripping extension wires. It also has a compact and lightweight design to reduce hand stress.
