Compatible with: Clorox Healthcare® Bleach Germicidal Wipes, Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant Wipes, Clorox Healthcare® Fuzion® Cleaner Disinfectant

Two Device Interfaces, One Network Platform

Citrix Ready and Terminal Services supported

ProScript Device Interface	Scriptouch ProScript signature pads use a generic HID interface that enables two-way communication with the device. Several software libraries are available for development under the ProScript API.
EasyScript Device Interface	Scriptouch EasyScript signature pads use keyboard emulation to transmit captured signature data. This enables signature capture in Windows or Linux, with any browser, without client PC installs and administrative headaches that come with the use of Java applets or ActiveX controls. The latest version, EasyScript 3.0, enables realtime signature rendering and the ability to switch between ProScript and EasyScript interfaces.
OmniScript Network Platform	The Scriptel OmniScript universal signature integration platform enables remote management of a Scriptouch signature pad over a network and provides a higher level API (requires devices with ProScript interface).

All Scriptel signature pads are verified Citrix Ready. In Citrix XenApp and XenDesktop and in other RDP-based virtualization architectures, Scriptel's optional Scriptouch Remote software enables trouble-free administration and operation of signature pads attached to the clients.

Important Features and Software Support	ProScript	EasyScript
No Client Install		✓
