

M-804EX-AM

Extension Module 4 Ports

Designed for exclusive use with the M-8080D, the M-804EX Extension Module 4 Ports is a port expander featuring a star connection of the controllers.

Attention:

1. A network router is required for setting up the M-8080D.
2. All accessory connections between the M-8080D and the RD ports must be made using shielded Category 5 cables or higher, along with shielded connectors.

Key features

- 1 digital port In (from M-8080D)
- 1 digital port Out for audio plus control
- 3 digital port Out for control only
- 24V DC power supply
