

5.5kW Single-Phase Switched PDU, Outlet Monitoring, 208/230V Outlets (20 C13 & 4 C19), 0U, LX Interface, TAA

MODEL NUMBER: PDUMVR30HVNETLX

Efficient, cost-effective 5.5kW PDU distributes, monitors and manages single-phase power in an IT or industrial environment. Built-in Ethernet interface helps monitor load levels to prevent overloads that cause downtime.

Description

The PDUMVR30HVNETLX 5.5kW Single-Phase Switched PDU provides advanced network control and remote power monitoring with the ability to turn on, turn off, reboot or lock out power to each outlet. Recommended for any IT or industrial application, it features 24 switched outlets (20 C13 and 4 C19). LEDs indicate each outlet's on/off power status, and you can monitor each outlet's power consumption remotely or via digital display. A 10-ft. (3.05 m) cord with NEMA L6-30P plug connects the PDU to a compatible AC power source, generator or protected UPS.

The built-in Java-free HTML5-based LX Platform interface enables full remote access for power monitoring, configuration, control and email notifications via secure web browser, SNMP, telnet or SSH. It supports 10/100 Mbps auto-sensing for optimum communication with an Ethernet network. Optional EnviroSense2 modules (sold separately) provide a variety of environmental monitoring capabilities. Protocols supported include HTTP, HTTPS, SMTP, SNMPv1, SNMPv2c, SNMPv3, Telnet, SSH, CLI, FTP, DHCP and NTP.

A digital LED meter allows you to monitor each bank's load in real time to ensure the PDUMVR30HVNETLX is used at maximum capacity with no danger of overload. The PDU mounts in 0U of space in EIA-standard 19-inch racks using the included toolless mounting buttons or the included rack-mounting brackets. Use the included PDUMVROTATEBRKT kit to install the unit with outlets facing the rear for better airflow or equipment access.
