Features

Flexible USB Charging Station Powers and Charges Up to 10 Devices at the Same Time
At home or in the office, this desktop charging station provides enough power and ports to keep your devices at high capacity. No more peering behind furniture to find an available outlet or unplugging one device to charge another. This metal charging station is ideal for homes with busy families, dorm rooms, conference rooms and offices with multiple mobile devices. It powers and charges up to 10 devices at the same time, including smartphones, tablets, laptops and e-readers. It doesn't require a computer, so you can take it anywhere AC power is available.

Provides Plenty of Power to Keep Your Devices at Capacity
Two USB-A ports provide a maximum of 5V 2.4A (12W) of power and two more USB-A ports provide up to 5A 2.1A (10.5W), enough for fast-charging most smartphones and tablets. Two USB-C Quick Charge ports provide up to 60W for battery-intensive devices like the MacBook Pro or Chromebook Pixel.

NEMA 5-15R Outlets Accept a Wide Range of Electronic Devices
Plug your computer, printer, wireless router, desk lamp or other home/office electronics into two NEMA 5-15R outlets to protect them against dangerous surges, spikes and line noise. A surge protection rating of 1000 joules defends your valuable electronic components. EMI/RFI filtering helps your connected equipment perform better and last longer.

Wireless Charging Pads Deliver Power to Phones
Who wants to mess with tangled cables when you just want to charge your smartphone? Two 10W charging areas make the process easier by charging wirelessly. Just place your phones against the charging surfaces for convenient charging.

Antimicrobial Protection Helps Provide a Safer, Cleaner and Healthier Environment
The Safe-IT™ charging station features antimicrobial protection that helps resist the growth of bacteria, viruses, fungi, mold and mildew.

Bold Triangle Desktop Design Gives You Plenty of Options for Placement and Use
The TLM210CAM offers one NEMA 5-15R outlet, one USB-C port and two USB-A ports on each side, making it ideal for shared workspaces, such as conference room tables. The 10-foot braided power cord with NEMA 5-15P plug connects to any standard AC wall outlet.
