## Code explanations

A = Good resistance B = Acce

B = Acceptable with limitations

C = Not recommended

- 1 = Possible crystallisation blockage or possible coating peeling
- 2 = Swelling of plunger, possible peeling.
- 3 = Acid vapours (better resistance with lower concentration).

Rinse the instrument in the rinse mode otherwise do not leave instrument on bottle.

- 4 = Risk of damage, softening or discoloration of external parts through vapours.
  - Rinse the instrument in the rinse mode otherwise do not leave instrument on bottle.
- 5 = Chemical degradation of glass parts (plunger/barrel).
